

Numerator vs. Year

Num. vs. Yr.

The above histogram is a display of the most common numerator. As the previous analysis shows that the numerators have slowly increased over time as the twitter user became more popular, this display is an indication of how long the site has been popular

What is evident in this graph is that there is a noticeable increase in rating as the tweet is posted at 0400, 2000, and 2100. There is an extreme spike in rating in 2017 for 1300. This time may have been targeted for the high volume of increasing numerator rating is liable to catch passersby attention.

Hour of Timestamp

Null 0 1 2 3 4 5 6
